

## EVOS ANNUAL PROJECT REPORT

**Project Number:** 040.

**Project Title:** Produce GEM Book

**Principal Investigator:** Brian Allee

**Time Period Covered by Report:** July 1, 2004-September 30, 2004

**Date of Report:** September 15, 2004

**1. Work Performed:** Chapters 1 through 11, the references section, and the acronym section of the book, have been edited and formatted. Galley proofs in the form of electronic PDFs have been sent to authors for chapters 1 through 10. Printing did not take place during this time period because we did not have all the content needed to complete the book. More time was needed to decide on content of book, to organize the book based on the Web GEM documents, to do research on the references section, and to make illustrations suitable for printing.

**2. Future Work:** The foreword will be written by editor Phil Mundy, and edited. The chapters will be corrected, if necessary, according to author input. An index will be created, and a cover and title page will be designed. The book will be printed and delivered to Sea Grant, and then distributed with an advertisement.

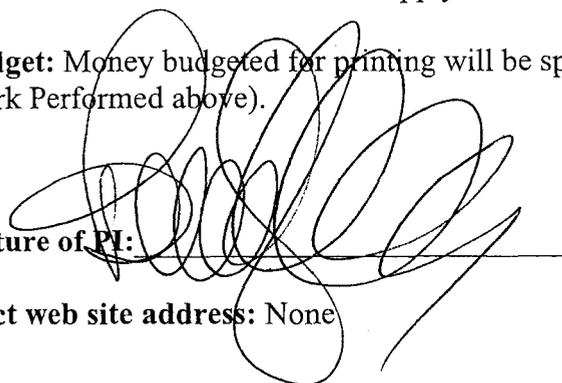

**3. Coordination/Collaboration:** Does not apply

**4. Community Involvement/TEK & Resource Management Applications:** Does not apply

**5. Information Transfer:** Does not apply

**6. Budget:** Money budgeted for printing will be spent during the second year rather than the first (see no. 1, Work Performed above).

**Signature of PI:**

A large, cursive handwritten signature in black ink, appearing to read 'Brian Allee', is written over a horizontal line. The signature is highly stylized and fills most of the space between the 'Signature of PI:' label and the 'Project web site address' label.

**Project web site address:** None
