

EVOS Annual Project Report

Project Number: 09290

Project Title: The *Exxon Valdez* Trustee Hydrocarbon Database

PI Name: Bonita Nelson

Time Period Covered: October 1, 2008 – September 1, 2009

Date of Report: August 28, 2009

Report prepared by: Bonita Nelson

Project website: www.afsc.noaa.gov/ABL

Work Performed: Data collected from projects 090808 and 070836 were entered into the database and analytical laboratory system. We responded to 8 FOIA requests concerning the hydrocarbon data. A thorough quality control analysis has been performed on the hydrocarbon database due to change in principal investigators.

Future Work: Continuing adding and analytical information from the above continuing projects and continuing to respond to FOIA requests. New queries will be constructed for ease of access to data.

Community Involvement/TEK & Resource Management Applications: N/A

Information Transfer: current version of database available at www.afsc.noaa.gov/ABL or from PI. PI attended the AK Marine Science Symposium in Anchorage in January and presented a poster.

Budget: The actual versus allocated budget expenditures were only slightly different. Less money was spent on contract labor than expected (1.5K) and was used for additional commodities.
