

00:36:36 Shiway Wang: 2 min per individuals, 3 min per group/org
00:36:41 Shiway Wang: for public comment
00:48:36 Linda Kilbourne: Clarification: There is \$13M encumbered for Research and \$22.7M encumbered for Habitat
00:50:38 Mark Hoover: Mark Hoover Chairman of Native Village of Eyak
01:32:45 stacystudebaker: For Kodiak Audubon, we would rank the three Kodiak proposals as: #1 Women's Bay, #2 City of Kodiak Ram Site Project, #3 Natives of Kodiak North Afognak Island project.
01:36:20 Shiway Wang: thank you Stacy! it was nice to hear your voice.
01:41:21 Clay Koplín: I would like to testify
01:41:25 Josie Hickel: Could I provide comments?
01:41:26 Clay Koplín: Mayor Koplín Alaska
01:41:34 Clay Koplín: Mayor Koplín Cordova
02:08:58 Willow Hetrick: It would be nice if each proposer was able to present their project like this because a power point presentation can be very persuasive as we are witnessing.
02:09:16 Willow Hetrick: The Alutiiq Pride Marine Institute also has a seawater heat pump.
02:18:04 Stacey Simmons: Thank you.
02:19:10 Shiway Wang: thanks for your message. This was a request made specifically by Trustee Brune because this is a continuing project and is a request for additional funding.
02:20:02 Shiway Wang: to clarify, the above message is in response to willow. the PWSSC facilities project is a continuing project asking for additional funding.
02:49:42 Willow Hetrick: The Seward Line Monitoring has been very important to our facility as we monitor incoming seawater for OA and this line supplements our data.
02:49:53 Willow Hetrick: *sea water
02:50:44 Aaron Poe: I just want to acknowledge the super-human feat of Shiway running through ALL of these so succinctly--thank you!

00:35:18 Willow Hetrick: Career applicants with greater resources and prior access to EVOSTC staff have the potential extinguish opportunities for new projects from new applicants.

00:50:19 Kristin Carpenter: Acknowledged, Willow.

00:55:44 caroldjanzen: Thank you for the compliments on the Data Management Program. Carol Janzen, AOOS/AXIOM

00:57:37 Willow Hetrick: Project #: 22220300 is a continuation of kelp test farm sites funded by the Economic Development Administration being deployed and monitored in Chenega, Tatitlek and Eyak. One of the major components of this project is developing hatchery capacity to grow kelp for farmers. None of the other projects do that. Project Number #: 22220302 is great â€“ but who is going to grow kelp for the industry? We are doing it now and with funding under Project #: 22220300 can improve on hatchery techniques to scale up and support the entire Sound. We support this project #: 22220302 but so far it only includes working Eyak which we support, but there are two other tribes (Chenega and Tatitlek) that have kelp test farm sites that could benefit from being included in this proposal. To date, no efforts were made to coordinate.

00:57:59 Willow Hetrick: Project #: 22220301 includes all communities and approximately \$1.5 million in direct funding to Native run non-profits in the region through extensive partnerships.

01:09:36 Aaron Poe: For what it's worth CRRC is a central partner and thought leader in 22220301 as well.

01:23:55 Aaron Poe: For what it's worth 22220301 starts with a Tribal Listening Tour to discern interests around mariculture that will invite all Tribes from the spill region.

01:33:02 Willow Hetrick: Project #: 22220400 includes approximately \$3 million to Alaska Native nonprofits in the region to ensure that outreach completed under the proposal reaches the native communities. Those include Chugach Regional Resources Commission and Chugachmiut. Chugach Regional Resources Commission through our 100% Tribal Board was heavily involved with the development of this proposal and feel it provides a sound base for education and outreach in our communities. We are happy to be a part of this important project.

01:38:34 Josie Hickel: The CHF proposal is both for Nuuciq Spirit Camp as well as other smaller camps in the Chugach region.

01:39:36 Josie Hickel: Koniag is not included in the proposal.

01:39:38 Willow Hetrick: Project # 22220405: is important for the youth of the region. This project will connect them with the natural environment in the spill region.

01:43:36 Shawna P DPOR: DPOR is here if there are any questions regarding our proposal: 22220401

01:57:27 Willow Hetrick: Thank you for your time today.
