1. Summary of Work Performed:

KRSA remains active promoting outreach and raising public awareness of the project. In June, a digital article was published in Fish Alaska Magazine and emailed to an estimated 30,000+ email subscribers. The blog titled “Conservation: A Look on at the Bright Side” highlighted the forty years of conservation projects KRSA has contributed to and informed the public of Big Eddy

improvements to include a parking lot, paving of the roadway, hundreds of feet of light penetrating boardwalks, access stairs, and improved separation of boaters & bank anglers.

On July 24 KRSA took a media crew out to tour the Kenai River. They visited the Big Eddy SRS and took pictures of its current state. The location was oversaturated with anglers as the last week of July is peak time for the late-run sockeye salmon season. When speaking with the public, many are excited about the improvements and look forward to construction beginning in 2025. See pictures below.
